

# Chapter 4: Project Integration Management

# Information Technology Project Management, Seventh Edition

Information Technology  
PROJECT MANAGEMENT | 7e

**ĐĂNG THỊ THU HÀ – SE**  
dtthuha79@gmail.com  
<https://lms.iuh.edu.vn>

# Learning Objectives

- ▶ Describe an overall framework for project integration management as it relates to the other project management knowledge areas and the project life cycle
- ▶ Explain the importance of creating a project charter to formally initiate projects
- ▶ Understand the integrated change control process, planning for and managing changes on information technology (IT) projects, and developing and using a change control system

# **Project Integration Management Processes**

- ▶ **4.1. Developing the project charter** involves working with stakeholders to create the document that formally authorizes a project—the charter.
- ▶ **4.2. Developing the project management plan** involves coordinating all planning efforts to create a consistent, coherent document—the project management plan.
- ▶ **4.3. Directing and managing project work** involves carrying out the project management plan by performing the activities included in it.

# **Project Integration Management**

## **Processes (cont'd)**

- ▶ **4.4.Monitoring and controlling project work** involves overseeing activities to meet the performance objectives of the project
- ▶ **4.5.Performing integrated change control** involves identifying, evaluating, and managing changes throughout the project life cycle.
- ▶ **4.6.Closing the project or phase** involves finalizing all activities to formally close the project or phase.

## **Initiating**

**Process:** Develop project charter

**Output:** Project charter

## **Planning**

**Process:** Develop project management plan

**Output:** Project management plan

## **Executing**

**Process:** Direct and manage project work

**Outputs:** Deliverables, work performance data, change requests, project management plan updates, project documents updates

## **Monitoring and Controlling**

**Process:** Monitor and control project work

**Outputs:** Change requests, project management plan updates, project documents updates

**Process:** Perform integrated change control

**Outputs:** Approved change requests, change log, project management plan updates, project documents updates

## **Closing**

**Process:** Close project or phase

**Outputs:** Final product, service, or result transition; organizational process assets updates

**Project Start**

**Project Finish**

# 4.1. Developing a Project Charter

- ▶ A **project charter** is a document that formally recognizes the existence of a project and provides direction on the project's objectives and management
- ▶ Key project stakeholders should sign a project charter to acknowledge agreement on the need and intent of the project; a signed charter is a key output of project integration management

# Inputs for Developing a Project Charter

- ▶ A project statement of work
- ▶ A business case (customer)
- ▶ Agreements ()
- ▶ Enterprise environmental factors ()
- ▶ **Organizational process assets**, which include formal and informal plans, policies, procedures, guidelines, information systems, financial systems, management systems, lessons learned, and historical information

# Project charter elements

- ▶ 1. Project title
- ▶ 2. Date Authorization
- ▶ 3. Start Date                      Finish Date
- ▶ 4. Key Schedule Milestones
- ▶ 5. Budget:
- ▶ 6. Project Manager
- ▶ 7. Project Objectives
- ▶ 8. Main Project Success Criteria
- ▶ 9. Approach
- ▶ 10. Role of Responsibilities:  
*Name, Role, Position, Information Contact*
- ▶ 11. Sign-off

**Project Title:** DNA-Sequencing Instrument Completion Project

**Date of Authorization:** February 1

**Project Start Date:** February 1

**Projected Finish Date:** November 1

**Key Schedule Milestones:**

- Complete first version of the software by June 1
- Complete production version of the software by November 1

**Budget Information:** The firm has allocated \$1.5 million for this project, and more funds are available if needed. The majority of costs for this project will be internal labor. All hardware will be outsourced.

**Project Manager:** Nick Carson, (650) 949-0707, [nearson@dnaconsulting.com](mailto:nearson@dnaconsulting.com)

**Project Objectives:** The DNA-sequencing instrument project has been underway for three years. It is a crucial project for our company. This is the first charter for the project, and the objective is to complete the first version of the software for the instrument in four months and a production version in nine months.

**Main Project Success Criteria:** The software must meet all written specifications, be thoroughly tested, and be completed on time. The CEO will formally approve the project with advice from other key stakeholders.

**Approach:**

- Hire a technical replacement for Nick Carson and a part-time assistant as soon as possible.
- Within one month, develop a clear work breakdown structure, scope statement, and Gantt chart detailing the work required to complete the DNA sequencing instrument.
- Purchase all required hardware upgrades within two months.
- Hold weekly progress review meetings with the core project team and the sponsor.
- Conduct thorough software testing per the approved test plans.

**ROLES AND RESPONSIBILITIES**

Name	Role	Position	Contact Information
Ahmed Abrams	Sponsor	CEO	aabrams@dniconsulting.com
Nick Carson	Project Manager	Manager	ncarson@dniconsulting.com
Susan Johnson	Team Member	DNA expert	sjohnson@dniconsulting.com
Renyong Chi	Team Member	Testing expert	rchi@dniconsulting.com
Erik Haus	Team Member	Programmer	ehaus@dniconsulting.com
Bill Strom	Team Member	Programmer	bstrom@dniconsulting.com
Maggie Elliot	Team Member	Programmer	melliot@dniconsulting.com
Sign-off: (Signatures of all the above stakeholders)			
<i>Ahmed Abrams</i>		<i>Nick Carson</i>	
<i>Susan Johnson</i>		<i>Renyong Chi</i>	
<i>Erik Haus</i>		<i>Bill Strom</i>	
<i>Maggie Elliot</i>			

Comments: (Handwritten or typed comments from above stakeholders, if applicable)

*"I want to be heavily involved in this project. It is crucial to our company's success, and I expect everyone to help make it succeed." —Ahmed Abrams*

*"The software test plans are complete and well documented. If anyone has questions, do not hesitate to contact me." —Renyong Chi*

## 4.2. Developing a Project Management Plan

- ▶ A **project management plan** is a document used to coordinate all project planning documents and help guide a project's execution and control
- ▶ Plans created in the other knowledge areas are subsidiary parts of the overall project management plan

# Common Elements of a Project Management Plan

- ▶ Introduction or overview of the project
- ▶ Description of how the project is organized
- ▶ Management and technical processes used on the project
- ▶ Work to be done, schedule, and budget information

## 4.3. Directing and Managing Project Work

- ▶ Involves managing and performing the work described in the project management plan
- ▶ The majority of time and money is usually spent on execution
- ▶ The application area of the project directly affects project execution because the products of the project are produced during execution
- ▶ Project planning and execution are intertwined and inseparable activities

# Capitalizing on Product, Business, and Application Area Knowledge

- ▶ It is often helpful for IT project managers to have prior technical experience
- ▶ On small projects, the project manager may be required to perform some of the technical work or mentor team members to complete the projects
- ▶ On large projects, the project manager must understand the business and application area of the project

# Project Execution Tools and Techniques

- ▶ **Expert judgment:** Experts can help project managers and their teams make many decisions related to project execution
- ▶ **Meetings:** Meetings allow people to develop relationships, pick up on important body language or tone of voice, and have a dialogue to help resolve problems.
- ▶ **Project management information systems:** There are hundreds of project management software products available on the market today, and many organizations are moving toward powerful enterprise project management systems that are accessible via the Internet

## 4.4.Monitoring and Controlling Project Work

- ▶ Changes are inevitable on most projects, so it's important to develop and follow a process to monitor and control changes
- ▶ Monitoring project work includes collecting, measuring, and disseminating performance information
- ▶ A **baseline** is the approved project management plan plus approved changes

## 4.5.Performing Integrated Change Control

- ▶ Three main objectives are:
  - Influencing the factors that create changes to ensure that changes are beneficial
  - Determining that a change has occurred
  - Managing actual changes as they occur

# Change Control on Information Technology Projects

- ▶ Former view: The project team should strive to do exactly what was planned on time and within budget
- ▶ Problem: Stakeholders rarely agreed up-front on the project scope, and time and cost estimates were inaccurate
- ▶ Modern view: Project management is a process of constant communication and negotiation
- ▶ Solution: Changes are often beneficial, and the project team should plan for them

# Change Control System

- ▶ A **change control system** is a formal, documented process that describes when and how official project documents and work may be changed
- ▶ Describes who is authorized to make changes and how to make them

# Change Control Board (CCB)

- ▶ A **change control board** is a formal group of people responsible for approving or rejecting changes on a project
- ▶ CCBs provide guidelines for preparing change requests, evaluate change requests, and manage the implementation of approved changes
- ▶ CCB Includes stakeholders from the entire organization such as Project Manager, sponsor, customer, expert, FM (Functional Manager)...

## 4.6.Closing Projects or Phases

- ▶ To close a project or phase, you must finalize all activities and transfer the completed or cancelled work to the appropriate people
- ▶ Main outputs include
  - Final product, service, or result transition
  - Organizational process asset updates

# Chapter Summary

- ▶ Project integration management involves coordinating all of the other knowledge areas throughout a project's life cycle
- ▶ Main processes include
  - Develop the project charter
  - Develop the project management plan
  - Direct and manage project execution
  - Monitor and control project work
  - Perform integrated change control
  - Close the project or phase
